

Whether we realize it or not, State Government Corruption Affects Us All!

My name is Patrick Beard and I believe that, as citizens, we don't have to accept that our politicians will always lack integrity or that corruption and political games are just a fact of life in Illinois. On the contrary, we deserve honest public servants who ensure that our tax dollars are used wisely and the people of Illinois are served with care, compassion and honor. With these goals in mind, I'm taking action and I invite you to join the fight with me.

My Goals Aimed at Citizens include:

- Inform citizens of how corruption affects them
- Let citizens know what they can do to combat corruption
- Rally citizens to informed/wise political action
- Provide connections to informative resources
- Work toward a day when Illinois citizens are not embarrassed by our elected officials.

My Goals Aimed at State Employees include:

- Unite state employees to stand up and speak out against wrongs
- Urge state employees to no longer fear reprisals and retaliation
- Strive for the time when all state employees will be proud to be public servants
- Encourage state employees to accept a noble mission as loyal guardians, fighting and working every minute to ensure that the good of the citizen is always the first priority.

Together we can do it!
